

TheSouxe FAQ

Q: Why treat water outside the body and not just the water in the body?

A: It's just plain more effective, and the reason for that is - the water in the glass, once prepped and structured, doesn't have any fears, beliefs, preprogramming of any kind, to overcome, in the way that your body and mind do.

Q: How long does the water remain charged?

A: The water should stay charged unless it becomes subjected to things and events that leave negative imprints upon it. Example - strong electromagnetic fields (some home appliances) tend to negate some of the water's charge if left near them for prolonged periods of time.

Q: Is it possible to charge another liquid while the first one hasn't been used yet?

A: Charged water remains charged. Previously charged liquid that hasn't been used will indeed remain charged with the particular objective regardless of charging a new liquid with a different intent.

Q: How long does the charged effect work? And what affects it?

A: This depends on the your primary objective is, for instance if you want to charge your water source with "Energy" the effects are felt a few minutes after drinking the water and can last for several hours. It all depends on what your objective is and if it can be delivered immediately or not.

Q: Is there any specific method required when putting attention?

A: This is very important piece of the charging process, once you push "TheSouxe" button you need to move your attention from the program to the source water. TheSouxe only requires a second for your attention to be on the source water then once the connection is made TheSouxe will do the rest.

Q: Is power of the programming affected by the computer's power?

A: No, its effected by how clear your objective is in your mind.

Q: Does my current mindset affect the result of water programming?

A: Yes you need to be clear minded and have a very clear objective in mind.

Q: Are there any recommendations regarded to the daily use of Sourxe?
Like how often I should use it, or how much charged liquid to drink daily?
Some sort of regime?

A: One of the greatest attributes of TheSourxe is your abilities to play. You are only limited by your imagination. When using TheSourxe, it really is counter productive to give you a set of criteria on proper usage for the simple fact that TheSourxe is an unlimited source of power. It taps into the very stream of creation that is unlimited in power and scope. Outside of simple instruction set provided in the User Manual, you are free to experiment and share your experiences on our forum.

Q: Is it possible to use Sourxe too much?

A: Yes, if your body starts to detox you should back off from using TheSourxe for few days. Detoxing is when the body starts to let go of low vibe material that is stored throughout your body in the form of energy. Detoxing can come in many forms like fatigue, skin rashes, flu like symptoms, red eyes and just feeling energetically unbalanced to name a few.

Q: Is it possible to charge the water in advance of filling the glass?

A: No, you should have the target water in the glass and ready before using TheSourxe to charge it.

Q: Are there any benefits to using charged water for plants or animals?

A: The benefits to plants and animals are just as great as they are to humans. For example using TheSourxe to charge a glass of water with the objective "Cleanse and Rejuvenate" would have the same effects on humans, animals or plants. Try treating a spray bottle filled with water with the objective "Insect Repellent" and spray it around your yard. Agian you are only limited by your imagination.

Q: Is it possible to program more liquids at once? Like a package of bottled water?

A: Yes all you have to do is move your attention from TheSourxe to the whole package of bottles.

Q: Is it safe and/or recommended to charge water for your family and friends?

A: TheSourxe taps into the very heart of creation where all Divine Love comes from, if your objective is in the purest interests of the people you are looking to help, then yes it will work. Otherwise you are just wasting your time. TheSourxe has many fail safe features built in but the biggest by far is where the power comes from and ultimately that determines the effectiveness of your objective.

Q: When used for others, does their knowingness and expectations affect the results/effectiveness?

A: Like anything in life your expectations or knowingness can really make or break your experience so like the motto says, "Your expectations upon entering THEsourxe determine your reality."

Q: What is the largest amount of liquid that can be charged?

A: There is no limit, just play and let your imagination run away when using TheSourxe. Peter Schenk, the creator of the software, experimented with sending intentions to the Gulf of Mexico during the oil spill disaster. We have to wonder why the devastation wasn't as great as initially reported.

Q: What happens if charged liquid is mixed with a non-charged liquid?

A: You will dilute the original charged liquid.

Q: Any other "tests" that easily show Sourxe's effectiveness?

A: Use TheSourxe on alcohol and watch how it take the sharpness and bite out of it.

Q: What about carbonated soft drinks? Can it be used on Pepsi or Coca-cola like beverages?

A: Sure you can.... try it on Root Beer.

Q: What if there's ice in the water?

A: Makes no difference.

Q: What happens if the charged water is frozen?

A: Water treated with TheSourxe will have a beautiful perfect structure when frozen unlike untreated water.

Q: What about using it on frozen liquids?

A: TheSourxe must be used on liquids not frozen liquids.

Q: Can you charge the same water again?

A: Of course you can - any water you use TheSourxe on will instantly have the highest vibrational state available.

Q: Can I charge different intents into different liquids?

A: Indeed you can – each liquid can be programmed with a specific intent. However, we suggest starting out small and scaling it up from there.
